Test Results: This dog is homozygous normal (clear) for Ichthyosis in the Golden Retriever.

Risk for developing Ichthyosis: This dog has two normal copies of the GR Ichthyosis gene. This dog will not develop the disease.

Significance for breeding: This dog will not transmit the genetic anomaly.

For further information, please consult the OptiGen website at www.optigen.com.

This test was performed in France at Antagene SA - Research and Analysis Laboratory in Animal Genomics. The ICT-A test for Ichthyosis is patented by CNRS. Antagene has an exclusive international license for providing this test.

International DNA Based Genetic Database: To register this result with OFA, make a copy, sign below, mail WITH FEE, to OFA, 2300 E. Nifong Blvd, Columbia, MO 65201-3856 or FAX to 573-875-5073. www.offa.org

I hereby certify that the sample submitted was of the animal described on this application. I authorize the OFA to release all information on the test results thus placing the results in the public domain and I hereby release OFA from any and all liability associated with the release of test information.
